DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by FR 2677398 A3. Note embodiment shown in figure 2. Magnet 3 has two transverse edges.

Claim Rejections - 35 USC § 103.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Whiting (3,178,762) in view of FR 2677398 A3.

"762 disclosed a doorstop as claimed but for a magnet. FR teaches a doorstop comprising a magnet for attachment to a metal component of the door. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the doorstop of Whiting with a magnet as taught by FR to attach the doorstop to the hinge without having to use other fastener and hand tools.

Conclusion

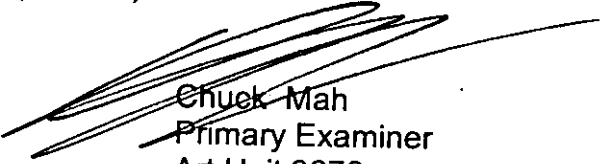

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
